BioDerm Sciences Names James Miller President

Pharmaceutical Commercialization Leader Chosen

Oxford, Mississippi - June 1, 2006: BioDerm Sciences, Inc. today announced the appointment of seasoned industry veteran, James A. Miller, as President of BioDerm Sciences, Inc. Mr. Miller will spearhead worldwide operations of this “discovery to commercialization” innovative pharmaceutical and medical device company that recently introduced its first four wound healing products in the United States.

Prior to joining BioDerm Sciences, Inc., Mr. Miller was Vice President of Business Development for Health Pathways, Inc. and Executive Vice President of King Pharmaceuticals, Inc. Over the span of more than thirty years within the pharmaceutical and medical device industries, he has held senior positions within sales, marketing, contracting and business development.

“Jim Miller was clearly the lead candidate to entrust the nine products being introduced into the market worldwide and to guide the development of the next generation of dermatological products,” stated J. Randall Hoggle, R.Ph., Chairman of the Board of BioDerm Sciences, Inc. Mr. Max Hipp, Oxford Economic Development Authority, stated, “Mr. Miller has tremendous operational and commercialization experience to lead this Oxford-based flagship medical device and pharmaceutical company.”

Dr. Ed Gubish, Chief Scientific Officer of BioDerm Sciences and Board member added, “Jim’s extensive experience in pharmaceutical commercialization will be immensely valuable in building the growth of our scientifically sound product lines.”

“I am honored to have been chosen to lead the BioDerm Sciences team in the production and commercialization of our products worldwide. My wife, Julie, and I look forward to becoming acquainted with Oxford and becoming an integral part of this vibrant community” said Miller.
